PROJECTS

- Aspiring **Frontend Developer** with a strong foundation in **web development** and **data structures**, backed by 6 years of technical support experience and a commitment to delivering efficient solutions.
 - Leverage proficiency in **HTML**, **CSS**, **TypeScript**, **React**, and **Redux**, alongside a strong foundation in **backend web development** and database management.
 - Eager to apply technical skills and a user-focused mindset to create **interactive web experiences** that drive innovative projects and achieve organizational goals.
- **Inventory Management System using Full Stack**
 - Developed a **full-stack** inventory management web application using the **MERN stack**, with **Redux** for efficient **global state management**. Designed the frontend using **React**, utilizing **React Hooks** for state and lifecycle management, and **JWT's** for secure authentication. Built **RESTful APIs** with **Node** and **Express** for seamless data handling, and employed **MongoDB** for robust data storage.
 - **Website:** [Inventory Stop](#)
 - **GitHub - Frontend:** [InventoryManagementSystem-Frontend](#)
 - **GitHub - Backend:** [InventoryManagementSystem-Backend](#)
 - **Frontend Mini Projects**
 - [Widget Dashboard](#)
 - [Streamline Interest Application](#)

TOOLS & TECHNOLOGIES

Frameworks	React, ExpressJS
Languages/ Libraries	JavaScript, TypeScript, ES6+, HTML, CSS
Tools & Technologies	VS Code, Jira, Confluence, Postman, NPM
Databases & Storage	MongoDB, MySQL
State Management	Redux, Context API
Deployment Tools	Netlify, Render
Version Control	Git

WORK EXPERIENCE

Nov 2024 - Present

- **Senior Product Engineer**
ESG Data & Solutions, Chennai, India
 - Extensively creating complex **UI components** including multiple key features for the **B2B SaaS** platform **ESGSURE AI** application using **React** and **TypeScript**.
 - Deft in **Scrum/Agile methodologies**, effectively engaging with the product, backend and design teams through retrospectives, daily stand-ups, PO demos, and participation in cross-functional team activities.
 - Enthusiastically contributing to **50+** meticulous **code reviews**, debugging, **testing**, and proficiency in diagnosing and **fixing bugs**.

- Taking **ownership** and **mentoring junior engineers** to deliver multiple modules in Smart Home application.

Jan 2021 – Nov 2024

• **Senior Technical Support Specialist**

Rently Software Development Private Limited, Coimbatore, India

- Translated **UI/UX designs** and **wireframes** into scalable **Smart Home** web application, aligning technical solutions with business needs, and ensuring **cross-browser compatibility**.
- Assisted in frontend development by designing **responsive user interfaces** and **reusable components** with **HTML**, **Tailwind CSS**, and **JavaScript**, optimizing performance for a seamless **user experience** across devices.
- Pioneered in **MQTT & Bluetooth** Hardware Integration for accessing **IoT devices**(Hubs, Smart Locks, Sensors, etc.) from the application User Interface.

Feb 2020 – Jan 2021

• **Process Executive**

Prakash Kochar & Co, Coimbatore, India

- Maintained strict adherence to quality standards by conducting regular audits, resulting in reduced error rates.
- Training and mentoring new team members. This involved in guiding company policies, procedures, tools, and sharing best practices and tips for effective client support.

Aug 2018 – Dec 2019

• **Customer Support Representative**

Amazon Development Centre Private Limited, Coimbatore, India

- Provided primary customer support to internal and external customers.
- Worked as "Subject Matter Expert" and helped colleagues with the resolution of customer issues.

EDUCATION

Aug 2014 - May 2018

• Bachelor of Engineering (Mechatronics)

Kongu Engineering College
Erode, India

LANGUAGE

• English – Strong verbal and written communication

PERSONAL SKILLS

- Fostered a **collaborative** approach with **cross-functional teams** to ensure seamless project execution and alignment, leveraging diverse expertise.
- Confident, articulate and **strong communication skills**.
- Driven by **passion** and a proactive mindset, I take full **ownership** of delivering efficient and scalable solutions in software development.
- Strong **problem-solving** skills with **attention to detail** for clean, maintainable, and optimized code.
- Adapted to **emerging frontend technologies** and trends by embracing continuous **learning** and incorporating engineering **best practices**, and standards, enhancing development processes and project outcomes.
